OWNER:

Metropolitan Government of
Nashville & Davidson County
Nashville, TN

ROOF SYSTEM:

United Coatings white
Elastomeric Coating

ROOF AREA PROFILE:

79,382 square feet
Roof Coating

PROJECT INFORMATION:

Nashville's multi-purpose entertainment venue plays host to a variety of special events including concerts, expositions, circuses, auto shows, conferences and much more. A 9,654 seat arena is the ideal facility for spectator events, while the 63,000 square foot exhibit hall is often filled with a variety of specialty expositions and conferences.

DETAIL:

The existing metal roof was power-washed, all joints and seams sealed, and a two-stage fluid-applied coating was spray applied. The coating seamlessly covers the existing metal roof, built in gutter and down into the drains. When applied properly, coating an existing roof will usually extend the life span of the roof by many years helping an owner get the most out of their roof investment.
