

# Roofing and Sheet Metal RD Herbert & Sons

## Portfolio :: Custom Stainless Steel

### Nashville International Airport Directories – Nashville, TN

**ADDRESS:**

One Terminal Drive  
Nashville, TN 37214

**GRAPHIC DESIGN  
COMPANY:**

Jarvis Signs  
Nashville, TN

**PROJECT INFORMATION:**

The base substructure is covered with 16 ga stainless steel. Framing the signs, a 16 ga painted steel facing adds impact. Laser-cut from the stainless steel, the sign letters are lit from within.

**DETAIL:**

Supported from two posts and multiple cross-bracing, this freestanding index allows for both tv monitors and brochures. The slot directly below the monitors accepts customer suggestions. Half-round tubing sets the feature back from oncoming traffic and possible damage from baggage carts. The two LED light fixtures are held in place by stainless steel collars welded to the post.
