ADDRESS:

Elephant Discovery Station
Museum of Natural History
Washington, DC

GRAPHIC DESIGN

COMPANY:

1220 Exhibits
Nashville, TN

PROJECT INFORMATION:

Working in conjunction with 1220 Exhibits, RD Herbert built the .063 ga patina bronze bases for the Elephant Discovery Station.

DETAIL:

The bases were fabricated in our shop in Nashville, shipped to Washington D.C. then assembled and installed by RD Herbert craftsmen. Fabricated with both welded and butt seams, these two-piece displays encourage interaction with the full-size African Elephant exhibit located in the Rotunda.
