Copper 16-oz standing seam/
flat lock roofs & Carlisle 60 mil
black EPDM roofs

ROOF AREA PROFILE:

4,639 square feet copper
2,095 square feet EPDM
Roof Replacement

PROJECT INFORMATION:

The center portion of the building was constructed in 1879 with the clock tower and two wings added in 1930. This historic structure in downtown Springfield, Tennessee required extensive exterior renovations in 2006. This building is listed on the National Register of Historic Places.

DETAIL:

Old roofing was completely torn off and replaced with new flat lock and standing seam copper, and EPDM roofs. Our metal work included new 16-oz copper coping, gutters, downspouts, flashing, edge metal, balustrades, along with new metal ridge flashing at the bell tower. Repairs to the metal balusters, frieze, and window cornices were also done as part of the renovations.
