Una-Clad 24 ga Dark Bronze
UC-500 flush seam wall panels

WALL AREA PROFILE:

14,300 square feet
New Construction

PROJECT INFORMATION:

The Lofts at Werthan Mills still reflect their original manufacturing purpose, at least at first glance. This complex originally housed a textile mill built in 1871. Preservation, adaptation, and creative re-use of the existing structures turned once dilapidated buildings into vital, distinctive lofts. RD Herbert & Sons Company has been part of the renovations from the start of Phase I.

DETAIL:

Phase IV, which included adding a parking garage, new town homes, and renovated outdoor community space created another 119 lofts to the growing development. Both the parking garage and the town homes are wrapped in Una-Clad Dark Bronze wall panels. The town house roof is constructed of Una-Clad 24 ga standing seam panels in Charcoal Gray. Corrugated metal panels in 24 ga Galvalume provide contrast at entrances, the cabana, stairs, and screen walls, reflecting the industrial origins of the complex.
